E. Bottum and John Elwell of Bennington, Vt."

Harry J. Cole returned last evening from a business trip to New York. He states that materials for the manufacture of clothing are growing scarcer with corresponding rise in prices, but that the business conditions in New York are improving and that the wholesale trade look upon the national depression as a matter of history. Business in the southern states is on the boom. Conditions in the west are slower but nevertheless are prosperous. The New England states are slowest to respond to the coming prosperity but this is largely due to the backward weather which the northeastern United States has experienced this fall. New York is busier and more optimistic, however, than at any time since the opening of the great war.
